## FX-940 ACI

Full automated conformal coating inspection

The Nordson ASYMTEK FX-940 ACI makes inspection of conformal coatings simple and convenient by automating the inspection process for quality and consistency of coatings under UV lighting with the use of proprietary inspection algorithms.

With minimal programming, the inspection set-up is fast and intuitive typically requiring less than 30 minutes. A known good board is used to learn the coverage and non-coverage areas. The automated inspection typically takes only a few seconds with inspection results immediately displayed. These results can be stored and reviewed off-line at any time. The FX-940 ACI also reads all common barcodes for product traceability.
